

MAHMOUD ABUELLIL

FULL-STACK ENGINEER | MERN | React Native | Next.js | TypeScript | AI Integration | Remote

✉ aboellil.dev@gmail.com | 📞 +20 122 108 9249 | 🌐 aboellil.dev | 📄 github.com/Abu-ellil | 🌐 linkedin.com/in/abu-ellil-806619254 | 📍 Cairo, Egypt (UTC+2)

PROFESSIONAL SUMMARY

Full-Stack Engineer with 4+ years of experience building scalable web and mobile applications using the MERN stack, React Native, Next.js, and TypeScript. Proven track record designing end-to-end products, developing REST and GraphQL APIs, integrating AI services (OpenAI, Google Gemini, Ollama), and delivering production-ready solutions from concept to deployment. Passionate about clean architecture, performance optimization, AI-augmented development workflows, and building products for global remote teams.

TECHNICAL SKILLS

Frontend React, Next.js, React Native, Expo, TypeScript, JavaScript (ES6+), Tailwind CSS, NativeWind	Backend Node.js, Express.js, REST APIs, GraphQL, Socket.IO, JWT Authentication, OAuth 2.0	Database & Cloud MongoDB, Mongoose, Firebase, Firestore, SQL, Redis (basic)
State & Architecture Redux Toolkit, Zustand, Clean Architecture, Component-Driven Design	AI & LLMs OpenAI API, Google Gemini API, Ollama, LM Studio, llama.cpp, AI Agent Orchestration	DevOps & Tools Git, GitHub, GitHub Actions, Docker, Linux, Vercel, Figma, CI/CD Pipelines

WORK EXPERIENCE

Freelance Full-Stack Engineer · MASOFT

2022 – Present | Remote / Cairo, Egypt

- Designed and delivered production-ready web and mobile applications from requirements analysis through deployment, serving clients across e-commerce, logistics, and agriculture sectors.
- Built a complete multi-platform delivery ecosystem (Driver, Store, Customer, Admin apps + Landing Website) using React Native, Node.js, MongoDB, and Socket.IO — handling real-time GPS tracking, order lifecycle management, and role-based dashboards.
- Developed AI-powered mobile applications integrating intelligent recommendations, image analysis, and third-party AI services (OpenAI, Google Gemini) — improving user engagement and automating manual processes.
- Architected scalable RESTful and GraphQL APIs using Node.js and Express.js with JWT/OAuth authentication, rate limiting, and optimized query patterns.
- Implemented real-time features using Socket.IO including live GPS tracking, in-app messaging, and live order status updates across 4 connected applications.
- Managed MongoDB and Firebase databases with optimized data models, indexing strategies, and caching layers to ensure sub-200ms query response times.
- Maintained Git-based workflows and CI/CD deployment pipelines (GitHub Actions, Vercel), enabling zero-downtime deployments and automated testing.

FEATURED PROJECTS

Delivery Platform

React Native • Node.js • MongoDB • Socket.IO • Expo • Google Maps API

- Built a complete delivery ecosystem with 4 interlinked applications (Driver, Store, Customer, Admin) and a marketing landing page.
- Implemented real-time GPS tracking, order management, and in-app chat using Socket.IO with geospatial queries.
- Developed role-based dashboards and complete order lifecycle management from placement to delivery confirmation.

Greeno-AI

React Native • Node.js • Firebase • AI APIs (OpenAI / Gemini) • Expo

- Developed an AI-powered agriculture assistant with plant disease detection using image analysis and computer vision.

- Added crop planning, weather alerts, and offline-first support for rural users with limited connectivity.
- Integrated AI and weather APIs with intelligent caching, reducing API costs by ~40%.

Soog App

[Next.js](#) • [TypeScript](#) • [Node.js](#) • [MongoDB](#) • [Stripe API](#)

- Built a complete e-commerce platform with server-side rendering, authentication, shopping cart, checkout, and order tracking.
- Used TypeScript across the entire application stack for type safety and maintainability at scale.
- Implemented SEO-optimized product pages and responsive design, improving organic traffic and mobile conversion rates.

LocalBench AI

[Python](#) • [Ollama](#) • [LM Studio](#) • [llama.cpp](#) • [Bash](#)

- Built tools for benchmarking local Large Language Models (LLMs) on consumer hardware.
- Evaluated model performance, memory usage, and inference speed across multiple quantization levels.
- Produced AI-focused technical documentation and developer content for the open-source community.

20 Vanilla JavaScript Projects

[JavaScript \(ES6+\)](#) • [HTML5](#) • [CSS3](#) • [REST APIs](#) • [Local Storage](#)

- Built 20 interactive JavaScript applications demonstrating DOM manipulation, API integration, async/await, animations, and responsive UI techniques.
- Showcased on GitHub with live demos, serving as a portfolio of foundational frontend engineering skills.

CERTIFICATIONS

- React – The Complete Guide (Udemy)
- Node.js & Deno.js Master Course (Udemy)
- JavaScript – The Complete Guide (Udemy)
- Responsive Web Design with HTML & CSS (freeCodeCamp)
- REST APIs, GraphQL, MongoDB & SQL (Udemy)

EDUCATION

Bachelor of Social Work — Fayoum University, 2008

Self-taught software engineer committed to continuous learning through professional courses, real-world projects, and open-source development.

LANGUAGES

- Arabic — Native | • English — Professional Working Proficiency
